PEOPLE ANALYTICS PORTFOLIO

People insights

Retention • workforce reporting • responsible BI

Where does the first-year experience need more support?

INDEPENDENT WORK • SYNTHETIC AND AGGREGATED DATA • NO EMPLOYER OR EMPLOYEE INFORMATION

Headcount rose, but the first-year experience was leaking talent.

WHAT I WANTED TO UNDERSTAND

Which workforce groups are driving avoidable turnover — and where should retention action begin without applying a blanket policy?

For people leadership, operations and workforce planning

A model built for patterns, not profiles

Employee snapshot × month

a focused intervention group

START WITH A PILOT

Strengthen the first 90 days.

Check in, coach managers, stabilise shifts and listen before prescribing.

A SUPPORT JOURNEY, NOT A BLANKET POLICY

Support first. Measure fairly. Claim only what the data can support.

“Aggregated trends can guide a conversation. They should not make an employment decision.”

01

FOCUS

Start with one operational group where the signal is strongest.

02

SAFEGUARD

Suppress small groups and keep detail restricted by role.

03

LEARN

Track onboarding experience and exits before scaling the response.

£84k

modelled cost avoided if 12 exits are prevented / £7k per exit / planning scenario only

MY APPROACH

I turn workforce data into fair, reviewable action.

The analysis should make the signal clearer, the safeguards more visible and the next conversation more useful.

LISTEN TO CONTEXT

Understand workforce flows and operating realities.

SHOW THE SAFEGUARDS

Keep logic, aggregation and review points visible.

FOCUS THE ACTION

Turn a broad signal into a fair, testable response.
